China cleans up Web with herbal-education

Zhang Jun, Ma Ying-Jeou & Ahamdinejad,

China closes down the Web for porno & violence!

Can you clean up NL-Web too, ... pléase.....?

**My Young adults have sleepless nights...
and this is not only due to the financial crisis!**

**This weekend – when I am without my kids –
I am going to explain them
'how to fall asleep'.**

**A nice task...but not easy!
Introspection for me, personally...
My exhausted words need to be put into energyzing thinking.**

Oké....

Are my sites available in Asia ?

I think China has to publish a list of Political -, Law- & HR-sites that are avialable on the E-government-site of China

You need you to publish 'good & bad' next to eachother.
Or close down 'bad'... in case of crime, porno, violent games...

China has excellent game-makers

= have them produce games for education on agriculture, water, to survive natural disasters, healthcare like anti-addiction-programas for drugs & alcohol or junkfood

And I need something else...I want to work with Herbal-eduction on NLFschool.com

The China Zhongshan Entepriises Centre next to Schiphol airport opened this month.
Who's in charge of security? Balkenende, Verhagen & Ter Horst? **FOEI...FOEI...FOEI...**

I watched a documentary on Chinese herb-families and the Herbal-medicine-education for doctors at universities....

I want you to open a unit for herbal-education in CAEC; starting with an affordable course for 'Young Adults in combat with Sleepless nights'.....

I am desperately searching for methods to 'put their minds at ease, while stimulating them to explore their own identity too..'.
We'd like to get to know those Herbal-families. They have a very healty perspective on identity!

Besides, herb-farmers in Africa need an opportunity to grow their plants & knowledge too.

Have an energetic-day in wisdom on the Long-distance track,

desiree
